The button will be gray-out and inactivate until the user's name field has input. Tap on the button to submit and go to the dashboard screen.

Dashboard screen default

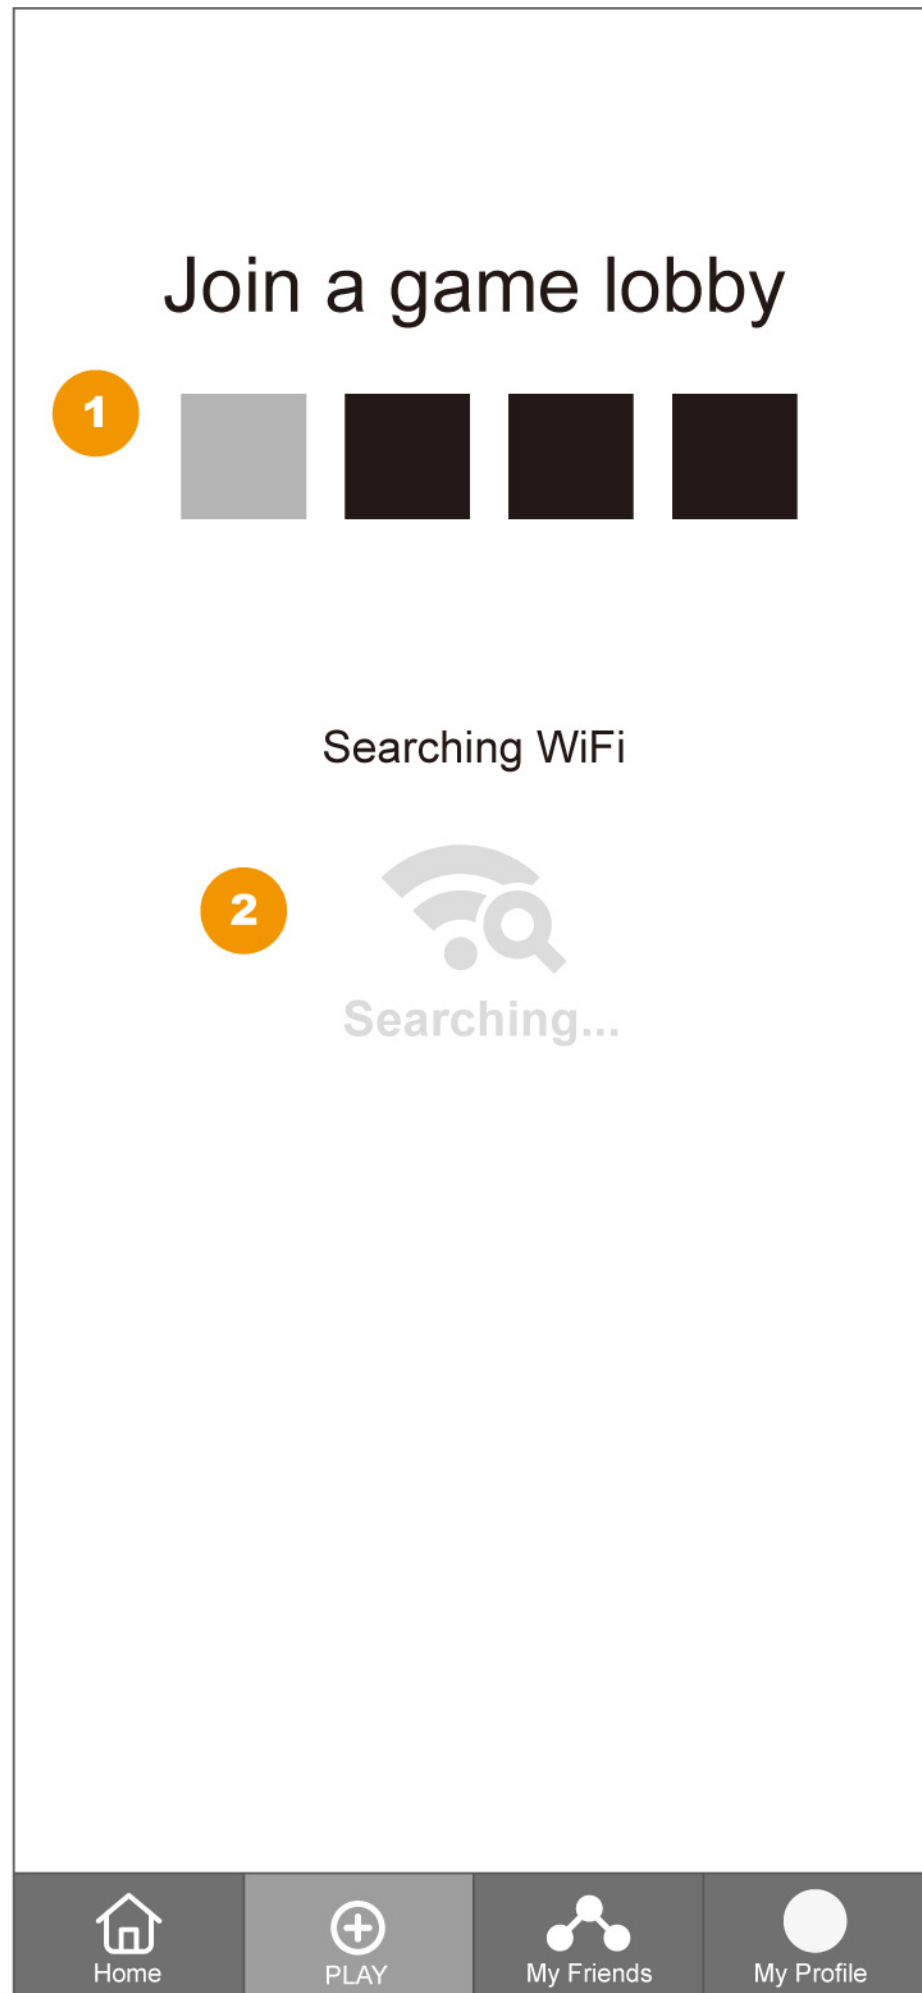

Popup/Modals

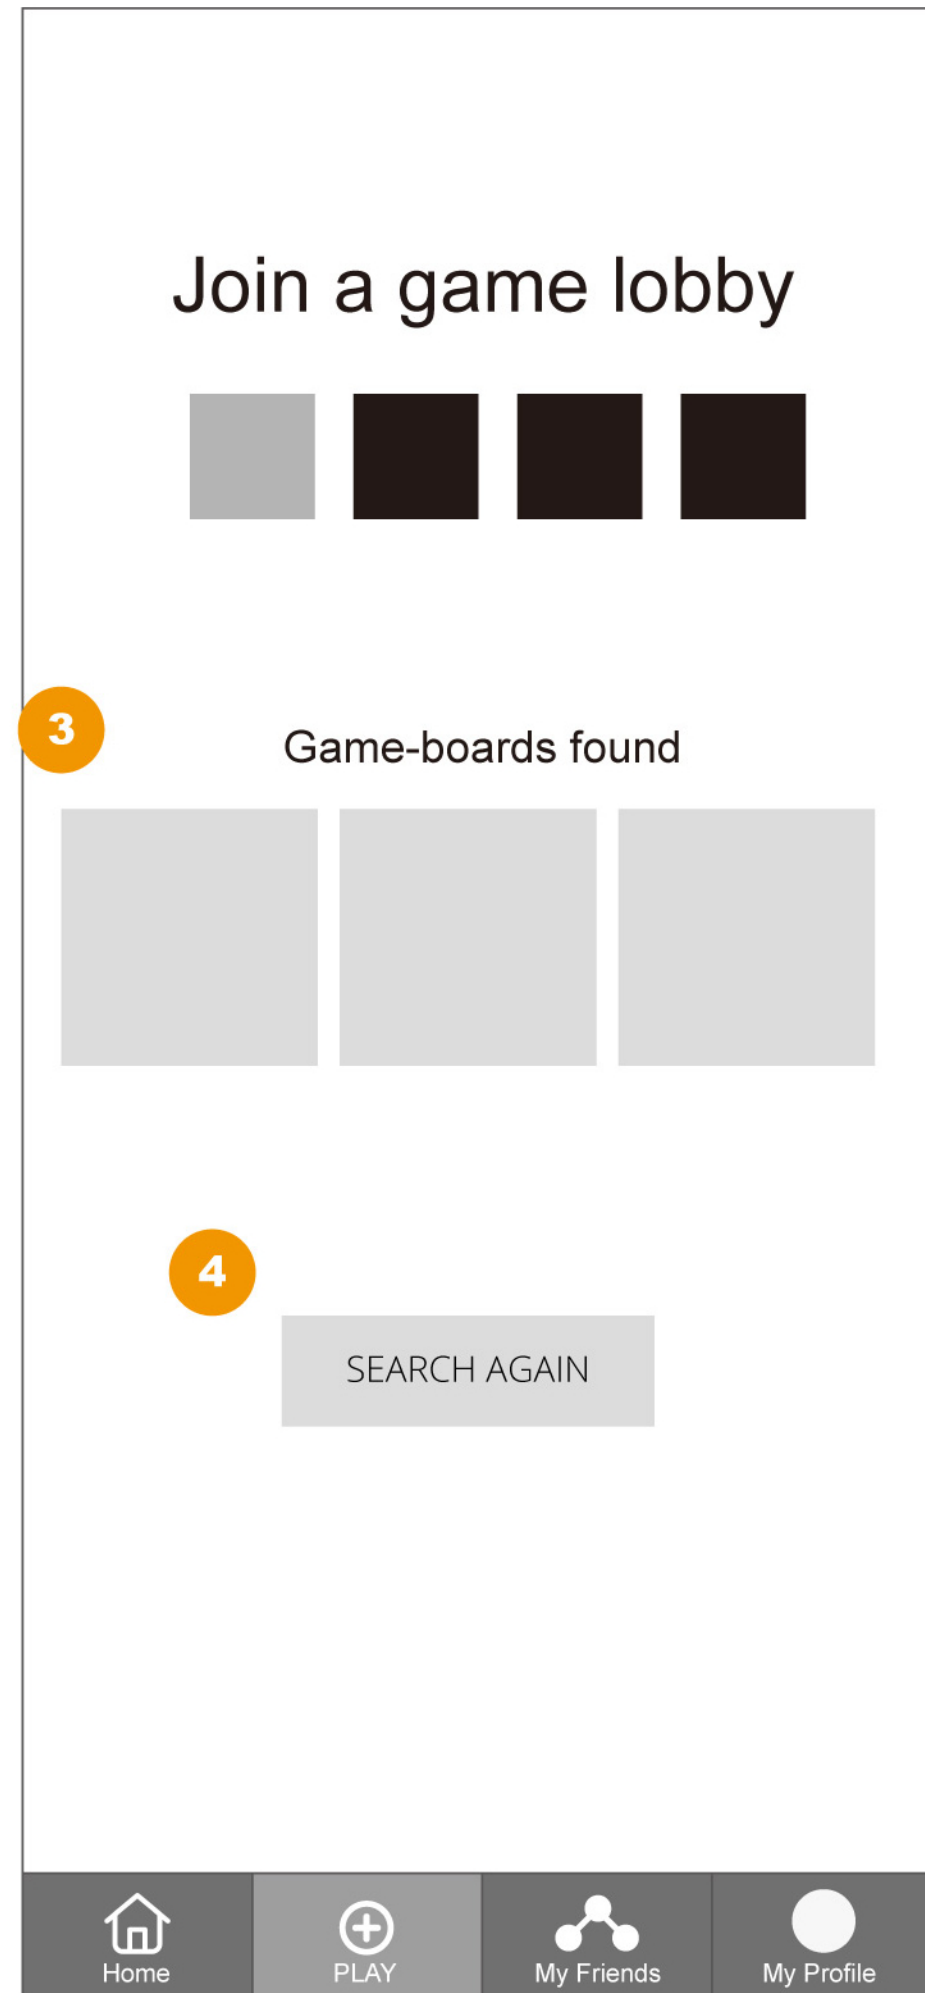

### Design Concept

After sign-in/up for an account, the users will be landing on the dashboard screen as the home screen for the app. The contents on the screen are mostly for users to connect to a board and start playing games.

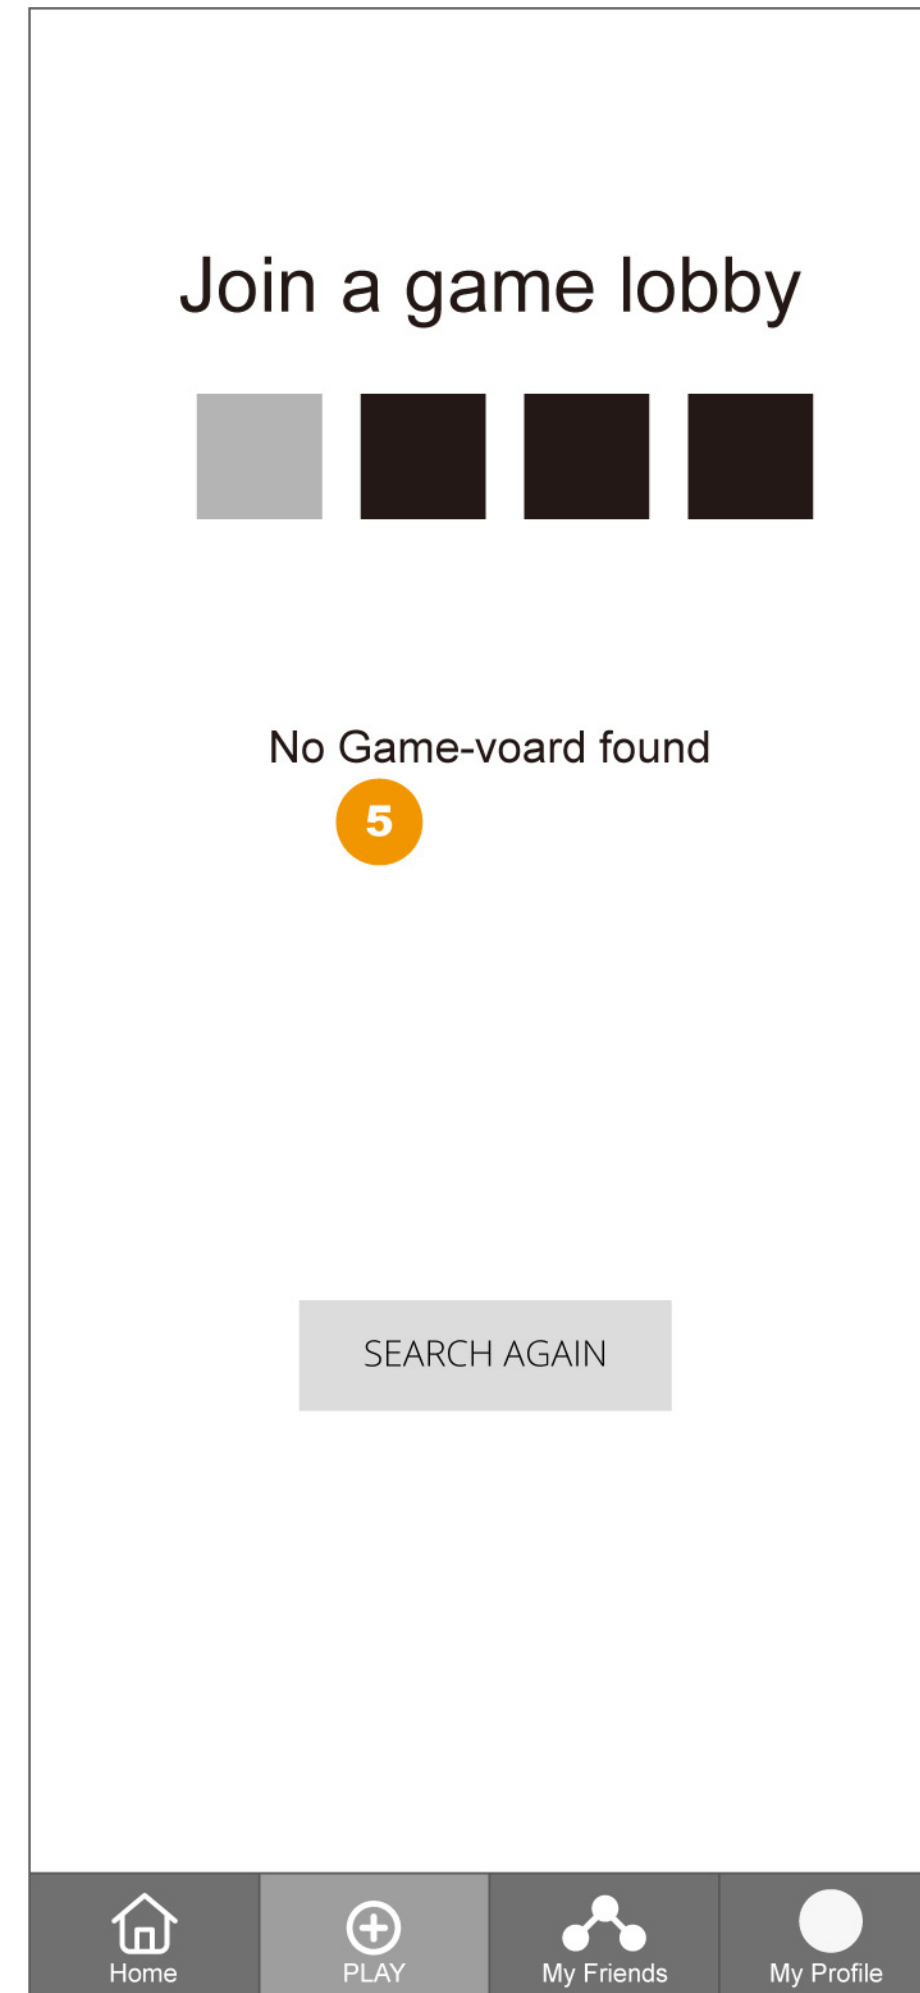

- 1 Featured Banners**  
It will display featured banners here. The size of the banner is 320/250 ratio based. The banners will be automatically rotated in a few seconds. Swipe left or right to browse banners. Tap on a banner will open the webpage by using either the app or the user's default web-browser.
- 2 Gameboards Quick Access**  
This row is to help users quickly access/connect to a board for game-play. It includes Local WiFi, Owned boards, Room-code, and QR scanner. By default, when landing on the screen, it will automatically search the local game-boards within the users' WiFi network. Users can tap on the icons/tabs to switch the ways they want.
- 3 My Friends List**  
By default, it will show only the active/online friends. Each friend will include the user's avatar, name, and an On/Offline indicator icon. The first item in the row will be always the "Add Friend" icon. Tap on the icon will link to the Add Friend screen.
- 4 Notification feeds**  
Will display notification like "Join-lobby invitation" and others here. Users can scroll up/down within the section to browse more. For invitation feed, before the invitation expires, users will see an open button. Tap on the row and/or the OPEN button to open the invitation modal. After the invitation is expired, it will then display as "Missed invitation" and become not tappable.
- 5 App/site main navigation bar**  
Tap on an icon in the bar will allow users to travel between the main sections. The current visiting section icon will be highlighted. For now, we have 4 main sections as Home (dashboard), PLAY (for joining and connecting to a game lobby), Friends (community), and My Profile.

PLAY - WiFi board

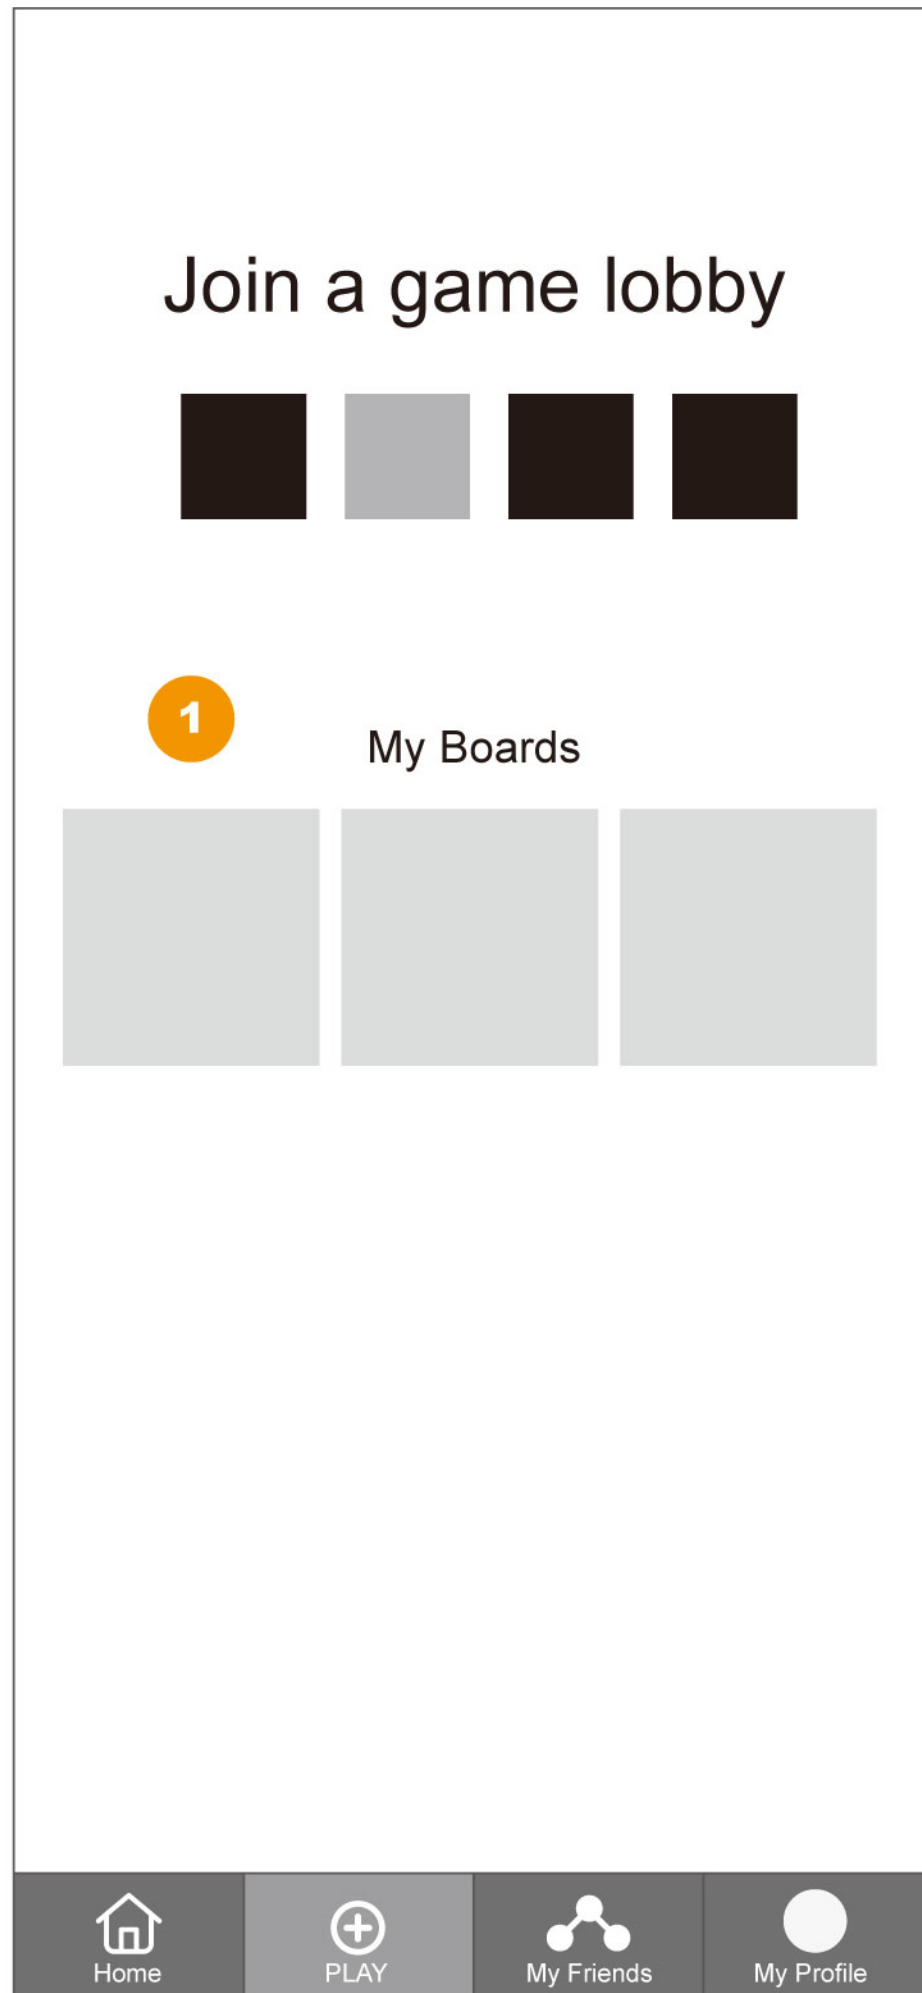

PLAY - WiFi board

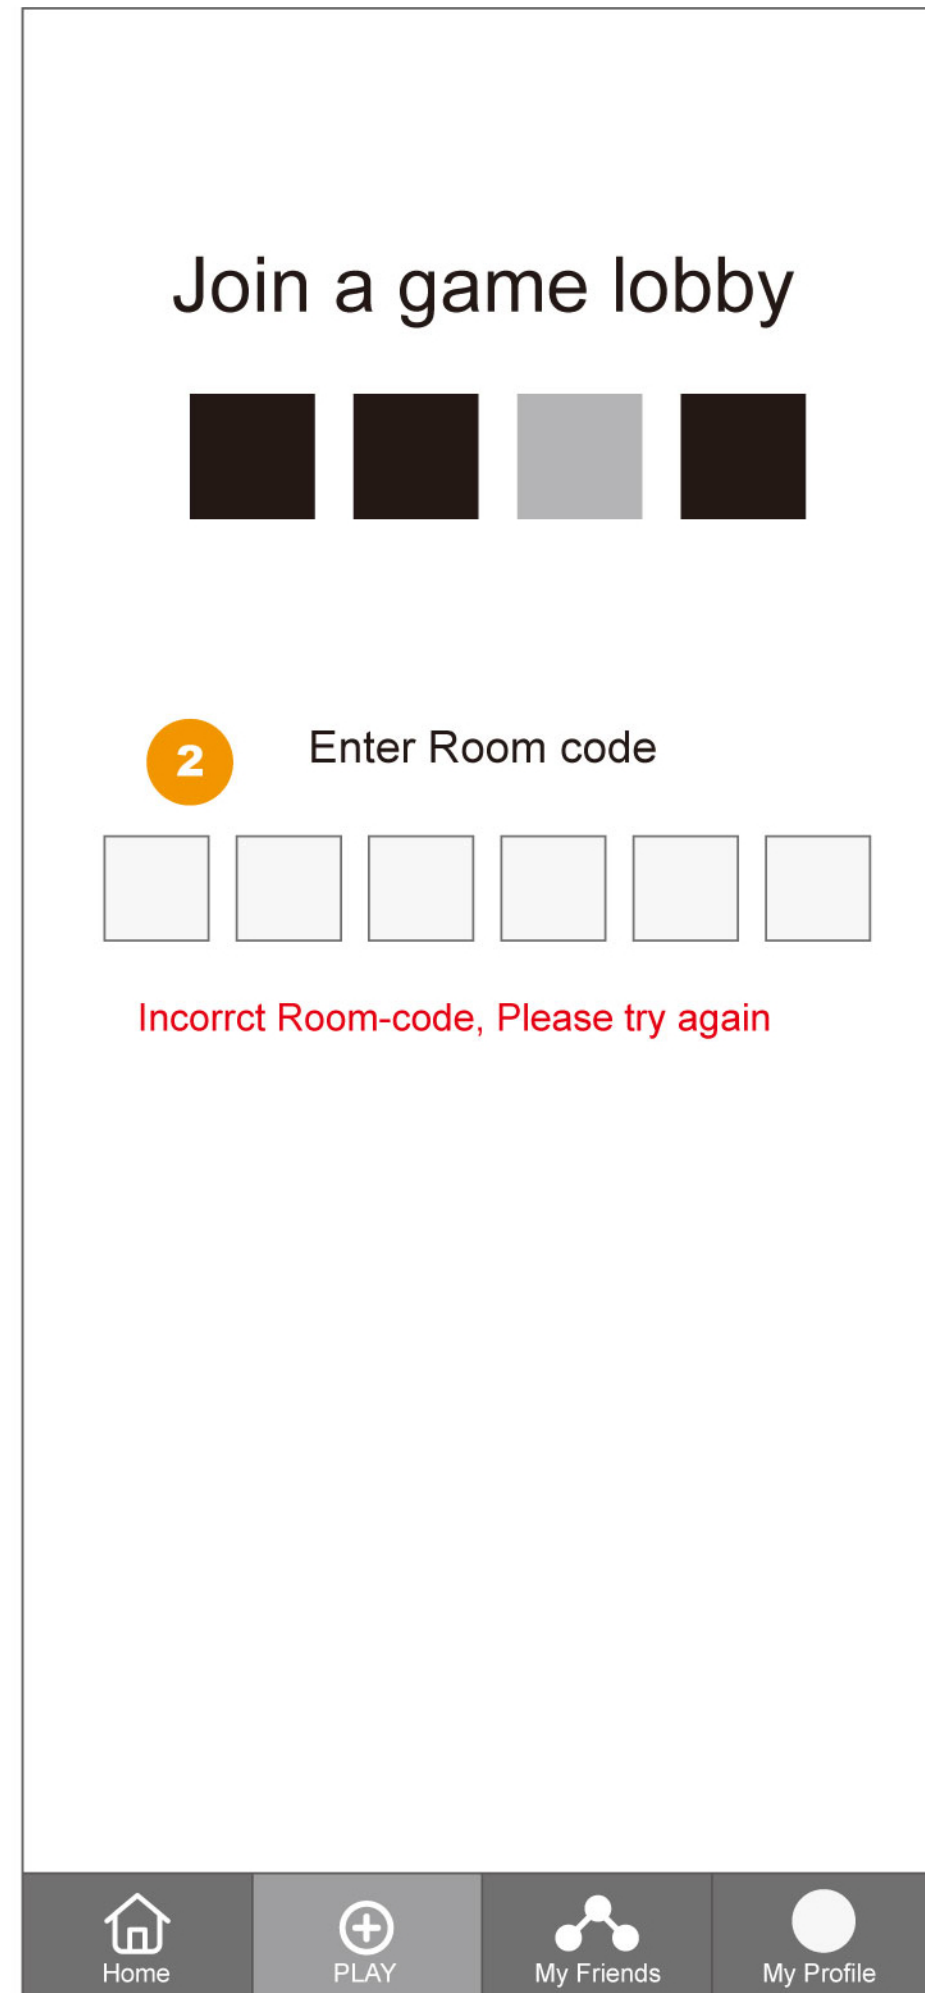

PLAY - WiFi board

- 1 **Main Tabs**  
Users can tap on the icons to switch between WiFi boards/My boards/ Room-code/ and QR scanner.
- 2 **Searching WiFi looping icon**  
By default, it will automatically search the local WiFi network for available game-boards.
- 3 **WiFi boards found result**  
After detect the boards, it will show them in this area with the owner's username and the board's name. Tap on a board to join the lobby.
- 4 **Search Again Button**  
Tap on the button to search again.
- 5 **No board found result**  
If there is no board found, this message will show up with a Try Again button. Tap on the button to search again.

PLAY - My Boards

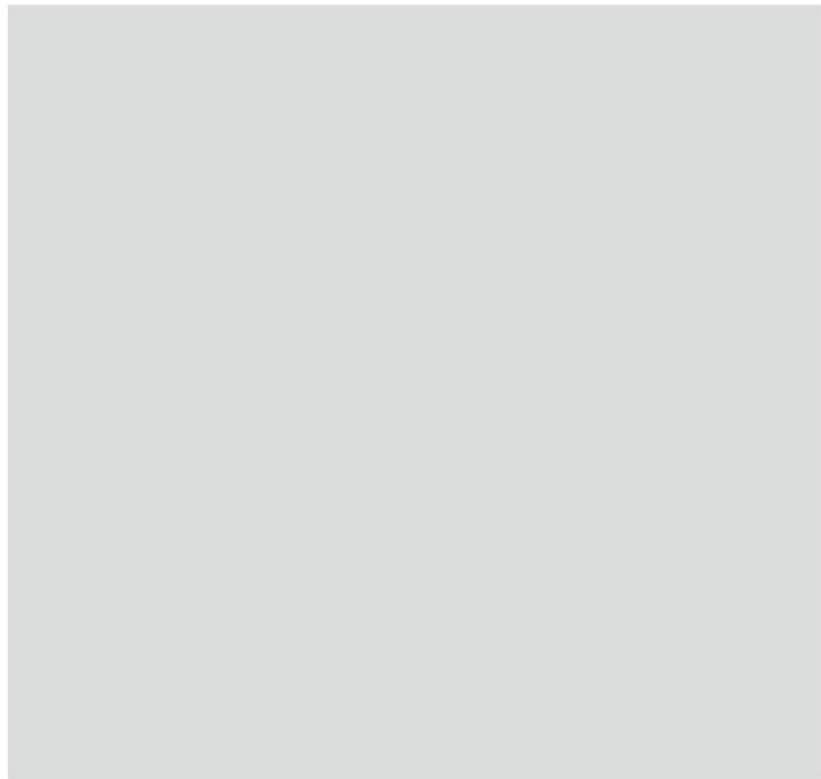

PLAY - Room-Code

- 1 User owned board**  
Will display all the boards that are belong to the current user account. Tap on a board to connect to it.
- 2 Room-code inout field.**  
When tapping on the room-code icon, this input field will show up. Tap on the fields will load the number-pad and start entering. Once the last digit is entered, it will automatically checking the code. If the code valid, it will connect to the board. If invalid code, it will show the error message unerneath.

## Join a game lobby
